

Here are the requested questions:

****Two Unique LeetCode Questions****

1. ****LeetCode Question 1:**** [Reverse Linked List](https://leetcode.com/problems/reverse-linked-list/) Given the head of a singly linked list, reverse the link.

```
class ListNode {
    int val;
    ListNode next;
    ListNode(int x) { val = x; }
}
```

Example 1:

Input: 1->2->3->4->5

Output: 5->4->3->2->1

Example 2:

Input: 1->2

Output: 2->1

****Correct Answers:****

Reverse the list and return the head of reversed linked list.

2. ****LeetCode Question 2:**** [Validate Binary Search Tree](https://leetcode.com/problems/validate-binary-search-tree/) Definition for a binary tree node.

```
public class TreeNode {
    int val;
    TreeNode left;
    TreeNode right;
    TreeNode(int x) { val = x; }
}
```

Example 1:

Input: [2,1,3]

Output: true

Example 2:

Input: [5,1,4,null,null,3,6]

Output: false

****Correct Answers:****

Validate the tree using in-order traversal and return true if all elements are in sorted order or false otherwise.

****Three Unique Pseudocode MCQs****

1. ****Pseudocode Question 1:**** Write a function that takes an array of integers as input and returns the sum of all the even numbers in the array.

```

input = [2,4,6,8]

output = ?

```

- A) output = 10
- B) output = 14
- C) output = 18
- D) output = 22

****Correct Answer:** B) output = 14**

2. ****Pseudocode Question 2:**** Write a function that takes a string as input and returns the number of vowels present in the string.

...

input = "Hello World"
output = ?

...

- A) output = 3
- B) output = 4
- C) output = 5
- D) output = 6

****Correct Answer:** C) output = 5**

3. ****Pseudocode Question 3:**** Write a function that takes two integers as input and returns the greatest common divisor (GCD) of the two numbers.

...

input = 12, 18
output = ?

...

- A) output = 4
- B) output = 6
- C) output = 10
- D) output = 12

****Correct Answer:** B) output = 6**
